

MEET McLAREN ONCOLOGY SERVICES

KARMANOS CANCER INSTITUTE
AT McLAREN BAY REGION

KARMANOS CANCER INSTITUTE AT MCLAREN BAY REGION

As part of the Karmanos Cancer Network, anchored by the Barbara Ann Karmanos Cancer Institute in Detroit, a National Cancer Institute-Designated Comprehensive Cancer Center, our patients have access to more than 250 promising new cancer-specific treatments often not found at other hospitals or health organizations. Together, we give your patients their best chance.

CLINICAL TRIALS

Karmanos Cancer Institute has hundreds of scientific investigation programs and clinical trials available, including those for prostate, bladder, and urinal cancers. Patients will be given the option of participating in a clinical trial. A clinical trial specialist and physician performs a screening process to determine if the patient can take part in a specific trial. To learn more, visit karmanos.org/clinicaltrials.

GENETIC TESTING

Cancer genetic counseling services help the patient and their family learn about the impact of their personal and family history has on their chance of developing cancer, and the risk other family members may have in getting cancer. Genetic testing also helps the patient understand prevention, early detection, and treatment options.

McLAREN PROTON THERAPY CENTER

The McLaren Proton Therapy Center in Flint, Michigan, is part of the Karmanos Cancer Network, which offers the most powerful and precise radiation oncology treatment available. Our highly skilled and experienced team of cancer specialists works collaboratively to provide an individualized treatment plan for each person's unique cancer and situation. This advanced technology delivers precise doses of radiation to cancer cells while sparing healthy tissue and reducing side effects. As a result, patients experience successful outcomes and a better quality of life during and after the treatment.

BONE MARROW AND STEM CELL TRANSPLANT (BMT) PROGRAM

The Bone Marrow & Stem Cell Transplant Multidisciplinary Team is led by specialists in medical hematology and oncology, infectious disease, immunotherapy, cardiologists, pediatrics and internal medicine who bring years of experience to the field of transplantation. The Foundation for the Accreditation of Cellular Therapy (FACT) program is one of only a select group nationwide reporting some of the best survival outcomes for related and unrelated stem cell transplantation, according to the Center for International Blood and Marrow Transplant Registry.

CAR-T THERAPY

Karmanos played a pioneering role in developing CAR-T cell therapy, demonstrating its safety and effectiveness for patients with blood cancers. This therapy is a type of immunotherapy made from a patient's white blood cells, which are genetically modified to recognize and attack the patient's cancer cells. These armed cells are a living treatment that will remain in the body to help prevent the cancer from returning.

McLAREN BAY REGION ONCOLOGY SPECIALTY SERVICES

Karmanos Cancer Institute at McLaren Bay Region, offers comprehensive oncology care, including medical oncology, chemotherapy and infusion, the latest in advanced radiation therapy, surgical specialists, and alternative therapy.

Our specialty clinic offers treatment of a variety of cancers including:
