

MEET McLAREN

DIGESTIVE HEALTH SERVICES

Whether your patient has abdominal pain or cramping, bloating, changes in bowel habits, constipation, diarrhea, incomplete bowel movements, narrow stools, rectal bleeding, bloody stools, or other digestive health complications, we are here to help. Our experienced team is dedicated to delivering the highest-quality care to your patients, treating a full range of standard and complex conditions with a comprehensive array of treatment options.

We treat common and complex upper and lower gastrointestinal (GI) tract conditions.

LOWER GI CONDITIONS TREATED:

- Colon and rectal cancer screening
- Diverticular disease
- Ulcerative colitis
- Crohn's disease
- Irritable bowel syndrome (IBS)
- Hemorrhoids and hemorrhoid banding
- Chronic diarrhea
- Anorectal diseases such as fissure, incontinence, fistula, and abscesses
- Chronic constipation

UPPER GI CONDITIONS TREATED:

- GERD/acid reflux
- Dysphagia (difficulty swallowing)
- Peptic ulcer disease
- Celiac disease
- SIBO (small intestinal bacterial overgrowth)

GI PROCEDURES AND TESTS

- Upper and lower endoscopy
- PEG feeding tube placement and replacement
- Esophageal variceal banding
- Capsule camera endoscopy
- Endoscopic ultrasound (EUS)
- Endoscopic retrograde cholangiopancreatography (ERCP)
- Esophageal manometry
- PH acid reflux study
- Esophageal dilation stenting
- Endoscopic ultrasound with needle biopsy or fine needle aspiration
- Esophageal, colonic, biliary and pancreatic stenting
- Esophageal dilation as a treatment for dysphagia
