

MEET McLAREN

COMPREHENSIVE SCREENING MAMMOGRAPHY

Why choose McLaren Flint Imaging for your patients' screening mammograms? Walk-in patients are welcome at both of our locations, and we have a breast navigator who personally reaches out to every patient deemed high risk. We have processes in place to promptly provide any necessary follow-up care. This results in shorter wait times and unified coordination across modalities and specialists, leading to a better experience for both referring physicians and patients.

OUR SERVICES

IMAGING

- 3D Mammography
- Breast MRI
- Breast Ultrasound
- Breast Biopsy at our McLaren Flint location

HIGH-RISK BREAST CANCER ASSESSMENT PROGRAM

Patients who schedule a screening mammogram receive a questionnaire about family history and other breast cancer risk factors. The software is imported into the Cancer Risk Assessment software tool, which uses a set of risk models (the Tyrer-Cuzick 8 model and National Comprehensive Cancer Network guidelines) to generate scores for these models. Patients whose lifetime risk of breast cancer is 20% or greater will be flagged in the system as high-risk. The CRA tool is integrated with Cerner to centralize physician and patient communication, specifically regarding patient risk.

SURGICAL SERVICES

- Auxiliary node dissection
- Sentinel node biopsy
- Lumpectomy/breast conservation
- Mastectomies (total simple mastectomy, skin-sparing mastectomy, preventive/prophylactic mastectomy), and nipple sparing mastectomy
- Oncoplastic surgery
- Simultaneous reconstruction with plastic surgery

WHY REFER TO MCLAREN FLINT IMAGING?

- Quick turnaround reporting for timely clinical decision-making
- Advanced imaging technology across multiple modalities
- Flexible scheduling and walk-in options for select imaging
- Clear, actionable reports that integrate smoothly into clinical workflows
- Coordination of care across modalities and specialists
