

McLaren Health Plan (MHP) is pleased to announce the

2027 Diabetic Measures Incentive

for Medicaid members

This Diabetic Core Measures Incentive is designed to reward and recognize McLaren Health Plan’s (MHP) Primary Care Providers (PCPs) who meet the HEDIS® requirement for completing diabetic core measures every year for MHP Medicaid members with diabetes, ages 18-75. MHP will reimburse you as described below:

Complete All Services	McLaren Health Plan Incentive
1. HbA1c test with result provided to MHP 2. Kidney Health Evaluation for Patients With Diabetes (KED) (eGFR and uACR)	\$50
Additional Incentive Opportunities if Above Criteria is Met	
1. Blood Pressure Control for Patients with Diabetes (BPD) <140/90 2. Glycemic Status Assessment for Patients with Diabetes (GSD-E) (<8.0)	\$25 for each controlled measure

For each of your MHP Medicaid members with the designated Diabetes HEDIS measures, who receive recommended services as identified by the list above, you will receive a \$50 payment. Once those two measures are complete (HbA1c test and KED measure), if their diabetes is appropriately controlled with an A1c below 8 and blood pressure below 140/90, you will receive an additional \$25 for each controlled measure.

Your current year incentive payment will be distributed in the summer of the following calendar year.

McLaren Health Plan retains the right to audit any of their providers at any time. Failure to comply with these audit requests, including any adverse audit findings, may impact the provider’s ability to earn provider incentive payments.

If you would like to set up a supplemental data feed directly with McLaren, please notify your assigned Provider Relations Representative.

Thank you for the quality care you deliver!
